GENERAL PROGRAM UPDATE

February saw both the Elton Gregory Middle School / Tom McCall Elementary School Addition (EGMS/TMES) and the Vern Patrick Elementary School Addition (VPES) transition from exterior work to a primary focus on interior work. With building water proofing finished on both projects, Griffin Construction (Griffin) installed windows, skylights, and exterior door frames. With these critical items finished, Griffin officially brought both additions to the state of being fully dried in. Being dried in means that water and vapor can no longer permeate the buildings. This allows drywall and insulation to be installed throughout the structures. An emphasis will be placed on continuing interior finish work throughout February and March. For the Redmond High School HVAC Upgrade (RHS), environmental safety firm G2 Consultants provided thorough sampling and testing of the spaces effected by the work that will be performed during the HVAC upgrade for this school. Kellcon Inc, the selected CMGC for RHS and the Hugh Hartman Elementary School HVAC Upgrade (HHES), will be able to use this information to create an asbestos abatement scope for the abatement contractors that will be working in RHS. HHES continues to be planned out and scheduled for Summer 2023. Both RHS and HHES are expected to see various trades contractors be selected by Kellcon Inc. through the bidding format over the coming months.

PROJECT ADMINISTRATION

Project administration and accounting support are two key areas critical to Program success. This is a combined effort of HMK Company and RSD Accounting Department. In the month of November, we have processed 19 background checks, requested 0 purchase orders, and processed 6 invoices.

CURRENT ACTIVITIES

February has been focused on electrical, mechanical, and plumbing contractors completing their initial installation. Griffin have been working to complete all wood framing for the skylight, soffit, and mechanical mezzanine. On the exterior of the addition, weather barriers and water proofing have been placed so exterior windows and skylights can be set. With all these exterior items installed, the building now is “dried-in”, which is when the outside weather should no longer affect the interior work. Starting in the end of the month, insulation and drywall has been staged to be hung throughout the addition.

ACTIVITIES SCHEDULED FOR NEXT PERIOD

Early March will see electrical, mechanical, and plumbing contractors completing their initial equipment installations. All primary trades will have a cover inspection performed which will allow insulation and drywall to be hung on interior walls. Griffin Construction will be focused on placing backing for drywall along the interior CMU walls so drywall production can continue throughout the month. On the exterior of the addition, CMU veneer will start to be placed by the bricklayers while the roof is shingled.

HIGHLIGHTS, CHALLENGES, SOLUTIONS

HIGHLIGHTS: The addition has been fully dried in which has allowed the initial installation of drywall to begin.

CURRENT ACTIVITIES

February has been focused on making the addition a dried-out space. Griffin has done so by installing weather barrier and water proofing products to the exterior walls of the addition so that windows can be installed. The roof of the addition has had the vapor barrier fully installed so that insulation and shingles can be completed in early March. Throughout the month, electrical, mechanical, and plumbing contractors continued to finish installations with anticipation to have inspections for all three trades before the end of the month.

ACTIVITIES SCHEDULED FOR NEXT PERIOD

March will see an increase of interior production as Griffin Construction works to install the hollow metal door frames and frame out interior spaces. Electrical and plumbing contractors will have completed their initial installations. The mechanical contractor will be set to have all initial duct work finished by the middle of the month. The air handler unit for the addition will also be placed and turned on by March 14th. Throughout the entirety of the interior of the addition, sheet rock and insulation will be hung and set. Asphalt roof shingles will also be placed, completing the last step of finishing the roof of the new wing.

HIGHLIGHTS, CHALLENGES, SOLUTIONS

HIGHLIGHTS: The new addition is now a dried-out space which has allowed interior production to quicken.

CURRENT ACTIVITIES

Griffin Construction continues to coordinate with subcontractors and engineers to push Obsidian Middle School towards completion. New issues have been discovered as Griffin quickly moves to solve or repair any problems. An updated punch list has been created for DDC controls and HVAC Commissioning which, when finished, will finalize this project.

ACTIVITIES SCHEDULED FOR NEXT PERIOD

Griffin Construction will have all needed contractors onsite during the first week of March to diagnose and solve any physical problems with the DDC or HVAC commissioning. These problems will be removed from the updated punch list as they are resolved.

HIGHLIGHTS, CHALLENGES, SOLUTIONS

HIGHLIGHTS: All controls work will be completed in March.

CHALLENGE AND SOLUTIONS: Controls closeout has proven to be a long process.

CURRENT ACTIVITIES

February has been spent continuing preparation for the start of the project. Focus has been placed on ensuring that all needed materials can be ordered and received before the project start date. HMK Co brought G2 Consultants, an environmental safety consultant, onsite to perform asbestos sampling and testing of any areas that will be affected by the project scope of work. These test results will aid Kellcon Inc. as they issue bids to abatement contractors. An emphasis has been placed on having any asbestos abatement completed before the project starts to ensure there are no delays to the project schedule.

ACTIVITIES SCHEDULED FOR NEXT PERIOD

March will see Kellcon Inc. performing pre-bid site walks with all needed trade contractors to ensure the most qualified contractors are selected for this project. The testing results of the asbestos sampling will be implemented to design an abatement schedule so the needed work can be staged in conjunction with the primary project. Focus will continue to be placed on ensuring all needed materials can be ordered and received before the project start date.
